Terms and Conditions: Scope of work is limited to a 30' exterior perimeter of house and to underground fuel oil tanks made from steel only (unless noted otherwise). Both GPR and EM measurement are remote sensing methods and in some instances, due to interference, site conditions or other geophysical limitations, do not reveal data which may be indicative of subsurface anomalies. Therefore, GPR One Call cannot guarantee that every subsurface object will be located at every site and cannot be held liable for failure to detect USTs, subsurface objects or utilities in areas where site conditions prevent detection. Site specific conditions such as air handling units, generators, aboveground storage tanks, metal fencing, sheds, rebar or wire mesh laden concrete, etc. will prohibit a complete investigation of the property. Areas under crawl spaces, decks, structures or additions are specifically excluded.
