423	FLOOD	RISK			
424	Flood ris	ks in Ne	ew Jersey are g	growing	due to the effects of climate change. Coastal and inland areas may experience significant flooding
425	now and	in the i	near future, in	cluding	in places that were not previously known to flood. For example, by 2050, it is likely that sea-level
426	rise will	meet or	exceed 2.1 fe	eet abov	re 2000 levels, placing over 40,000 New Jersey properties at risk of permanent coastal flooding.
427	In additi	on, pre	cipitation inter	nsity in	New Jersey is increasing at levels significantly above historic trends, placing inland properties at
428	greater ri	sk of fla	ash flooding. T	hese an	d other coastal and inland flood risks are expected to increase within the life of a typical mortgage

439	[]	X]	[]	129.	Is the Property subject to any requirement under federal law to obtain and maintain flood
440					insurance on the Property?
441					Properties in the special flood hazard area, also known as high risk flood zones, on FEMA's flood insurance rate
442					maps with mortgages from federally regulated or insured lenders are required to obtain and maintain flood insurance.
443					Even when not required, FEMA encourages property owners in high risk, moderate risk, and low risk flood zones
444					to purchase flood insurance that covers the structure and the personal property within the structure. Also note that
445					properties in coastal and riverine areas may be subject to increased risk of flooding over time due to projected sea level

454	[]	[X]	[]	131.	Is there flood insurance on the Property?

459					An elevation certificate is a FEMA form, completed by a licensed surveyor or engineer. The form provides critical
